environments

DANTHERM

Dantherm was founded by Ejler Olsen in 1958 and the company's first product was a warm air heater for workshops and industrial buildings. Over the following 30 years, the product portfolio was extended to include dehumidifiers, ventilation units, mobile heating and cooling units for the armed forces and aid organisations and finally electronics cooling solutions.

Today, Dantherm holds an important position on the European market as provider of dehumidification, ventilation and mobile heating and cooling solutions. For electronics cooling solutions within the Telecom segment, Dantherm is a leading global supplier and counts customers among all major network suppliers and selected network operators.

CLIMATE CONTROL

Dantherm's business foundation is climate control, and the company has more than 50 years of experience as a developer of energy-efficient solutions within heating, ventilation, cooling and dehumidification of air. Energy consumption is an important factor in climate control, and in the coming years, requirements concerning energy consumption will become stricter everywhere. Even in countries where energy savings have not been a priority until now, there is a growing recognition of the importance of saving energy. The market for Dantherm's products is therefore expected to grow, which provides a good basis for our growth strategy.

GROWTH STRATEGY

Dantherm has a focused growth strategy and works with determination on developing new and existing relations, markets and products.

Internally we focus on efficient processes and organisational competence as foundations of our growth. Further promotion of Dantherm is the key to increasing awareness of our brand and making our business grow.

INNOVATION

Every year, Dantherm utilises significant resources on product development. This way, we make sure to remain an innovative company constantly adapting our solutions to market demands and always offering our customers highly competitive solutions. To this come Dantherm's modern production and test facilities in Denmark, China and the USA which provide a strong foundation for the global supply chain.

A company with ambitions

Dantherm is listed on the Copenhagen Stock Exchange and currently has approx. 4,000 shareholders.

CONTROL YOUR CLIMATE

EXPERT

- YOUR PREFERRED PARTNER -

Being an expert supplier of reliable climate control solutions means committing to staying ahead of the game. With more than 50 years of experience, we have built extensive knowledge in our field. By combining this knowledge with continuous exploration of new technologies, we make sure to live up to our promise of providing expert solutions.

SAVINGS

- A SOUND INVESTMENT -

Controlling your climate also means controlling your energy costs. The Dantherm solutions are developed specifically to meet the requirements of our customers while lowering energy consumption, and will for specific products lead to energy savings of up to 90 %.

COMPLETE CLIMATE CONTROL DEFINES DANTHERM

Electronics cooling, ventilation, dehumidification and mobile heating and cooling have been at the heart of our efforts for more than 50 years.

We engineer reliable, energy-efficient and cost-saving thermodynamic solutions and are dedicated to being your preferred partner in climate control.

RELIABILITY

- PRODUCTS YOU CAN TRUST -

Designing and constructing solutions that live up to the high standards of our customers is a promise that Dantherm takes very seriously. Our products are built with long-lasting components and thoroughly tested to ensure optimum performance.

EFFICIENCY

- SOLUTIONS THAT MAKE A DIFFERENCE -

An important element of installing a climate control solution is to feel the change - of climate and energy costs. Being a supplier of efficient climate control systems means that Dantherm provides solutions that generate instant results, perform impressively and generate savings.

THE DANTHERM CLAIM - CONTROL YOUR CLIMATE

We develop our solutions in close co-operation with our customers. This means that all solutions are created to meet the specific requirements of our markets; expertise, reliability, efficiency and savings.

Dantherm is proud to promise all this in three, simple words: Control your climate!

ELECTRONICS COOLING

700.000+ PRODUCTS

Network operators and suppliers have specific needs for climate control in shelters, cabinets, enclosures and rooms containing sensitive electronic equipment.

That's why Dantherm has developed a range of reliable and highly energy-efficient electronics cooling systems that drive down costs and maximize uptime.

With more than 20 years of developing and producing cooling solutions for the Telecom industry, Dantherm knows the business and the challenges that network operators and suppliers meet every day. This makes us the preferred partner for electronics cooling and substantiates our position as a leading global supplier of climate control solutions.

Our products for electronics cooling are developed specifically to ensure site uptime and provide reliable, cost-efficient climate control leading to energy savings of up to 90 %. Our engineers and technical department develop customer-specific solutions to ensure that each solution matches the needs of the individual site.

DEHUMIDIFICATION

350.000+ PRODUCTS

Dantherm dehumidifiers have been synonymous with quality, reliability and efficiency for more than 30 years.

Today we are market-leading providers of state-of-the-art mobile and stationary dehumidification systems for the industry, indoor swimming pools, construction sites and damage control.

The Dantherm dehumidification systems and mobile dryers make sure you save time, energy and money while protecting your buildings and the valuables inside it. This whether you need dehumidification for indoor swimming pools and spas, dampness control in warehouses, museums and churches or drying capabilities for flooded cellars, damaged buildings or construction work.

Our range of dehumidifiers includes condense and adsorption dehumidifiers in stationary and mobile models as well as solutions for damage recovery and other specialised applications.

VENTILATION

50.000+ PRODUCTS

Dantherm ventilation and air conditioning systems are built on single-minded dedication to energy-efficiency, durability, reliability and low lifecycle costs.

Our range of systems are equipped with advanced heat recovery technology and are built to provide superior ventilation in indoor swimming pools, leisure and shopping centres, hotels, schools, private homes and more.

For more than 35 years, building owners, architects and HVAC specialists have benefited from the quality, efficiency, durability and fast return on investment that Dantherm ventilation systems deliver.

We divide our range of heat recovery and air conditioning systems into three main segments; mechanical ventilation with heat recovery for private homes; ventilation and dehumidification for indoor swimming pools and; ventilation for commercial applications. This means that you'll find a Dantherm ventilation system that meets your every need, whether you are looking for the perfect heat recovery or air conditioning system or tackling a challenging indoor swimming pool project.

And best of all, you'll know that whoever ends up using your building will enjoy greater indoor comfort and the satisfaction that goes with sustainable living.

MOBILE HEATING AND COOLING

20.000+ PRODUCTS

For more than two decades, Dantherm has been the preferred supplier of field deployable mobile heating and cooling units for military and humanitarian field camps.

Our climate control solutions for extreme weather conditions have been adopted as a NATO standard and ensure optimum conditions for those working in challenging climates.

Some environments require particularly resistant units. That's why our rugged and reliable mobile heating and cooling solutions are the preferred choice for military and humanitarian camps worldwide.

Dantherm works closely with tent and container suppliers to develop site-specific, customized solutions for military camps, relief camps, field hospitals and similar sites. All our units are produced at state-of-the-art Dantherm manufacturing facilities in Denmark and are built to comply with advanced AQAP requirements as well as the ISO 9001 and 14001 standards.

Our mobile heating and cooling systems are exceptionally versatile, rugged and reliable and operational at temperatures from -40°C to +60°C. They are easy to set up and maintain and the light-weight designs and materials keep logistics costs low.
